

APICS Certification: International Certification

Certified in Logistics, Transportation and Distribution (CLTD)

The CLTD program helps you demonstrate in-depth knowledge of a broad range of supply chain logistics topics to set you apart from your peers — proving your high level of knowledge and skills. You'll be a more valuable asset to your organization, keeping you and your organization more competitive in today's global economy

Join the more than 1,000 professionals since the program launch in 2016 who have mastered essential knowledge and concepts to streamline logistics operations.

Why you should earn the CLTD designation

Become a recognized expert in the logistics, transportation and distribution fields. Certification demonstrates in-depth knowledge of a broad range of topics to set you apart from your colleagues — proving your high level of knowledge and skills. You'll be a more valuable asset to your organization, keeping you and your organization more competitive in today's global economy.

The APICS CLTD Learning System is a comprehensive professional development and exam preparation program. It consists of eight reading modules and interactive, web-based study tools that reflect the new APICS CLTD Exam Content Manual (ECM). This program provides a comprehensive body of knowledge and standards for those in the logistics, transportation and distribution industries. Each module will further empower you with an understanding of best practices, knowledge and skills necessary to maximize your organization's efficiency and impact the bottom line. No matter where you are in your career, earning the CLTD credential will demonstrate your mastery of a broad range of logistic, transportation and distribution topics.

APICS/AST&L Merger

- APICS merged with the American Society of Transportation and Logistics (AST&L) in 2015.
- Better integration of logistics, transportation and distribution in the end-to-end supply chain.
- Replacing AST&L's certified in Transportation and Logistics (CTL) certification and create the new, expanded CLTD.

Telephone: +27 (0) 82 553 8888, E-mail: mglasconsulting@telkomsa.net,

Registration No. 2008 / 262245 / 23

The benefits of earning the CLTD designation

- Gain recognition in the field as a logistics expert
- Build credibility and set yourself apart from peers
- Learn latest trends in global supply chain logistics
- Impact your organization's bottom line
- Demonstrate logistics mastery of knowledge

Earning the CLTD credential will help you:

- Master the essential knowledge needed for the logistics, transportation & distribution industry
- Bring new ideas to your organization
- Remain current with global logistics trends & developments
- Boost your confidence with recognition as a logistics expert
- Reduce costs & impact your organization's bottom line

Registration No. 2008 / 262245 / 23

Employer Types	Industry Sectors	Transportation/Distribution Sub-domains
<ul style="list-style-type: none"> • 3PLs and logistics services –Asset based, non-asset based • Manufacturing firms–Direct or indirect • Retailers • Government/military • Mega-construction • Energy production/supply • Large distributors • Importers/exporters • Service industry providers • Consulting firms 	<ul style="list-style-type: none"> • Automotive • Commodities & industrial • Defense & government • Food & beverage • Healthcare • Energy, oil, & gas • Pharmaceuticals & chemicals • Retail • Technology • Humanitarian aid 	<ul style="list-style-type: none"> • Air cargo • Contract logistics • Freight forwarding • Intermodal • IT solutions • Road freight • Ocean freight • Warehousing • Humanitarian aid

About the APICS CLTD program content

Divided into eight modules across four books, the Learning System content is integrated with best practices in the day-to-day functions of logistics professionals to drive improvement in distribution and transportation, maximize efficiency and impact the bottom line.

Module 1: Logistics and Supply Chain Overview

- Managing logistics as a cohesive system
- Understanding tradeoffs to present a logistics strategy that aligns with the organizational strategy
- Finding the most effective mix of revenue producing services for the cost of providing that service
- Developing strong relationships across the supply chain
- Designing key performance indicators to encourage desired behaviors
- Using continuous improvement to exceed customer expectations

Module 2: Capacity Planning and Demand Management

- Understanding the concepts behind forecasting and its application to logistics decisions
- Creating efficient forecasts to better align supply to demand
- Translating demand information into high-level capacity plans for warehousing and transportation
- Collaborating between procurement and logistics
- Understanding key processes, including S&OP, MPS, MRP and DRP
- Delivering customer service at a consistent level

Marieta Glas Consulting & Training CC. Address: 222 Petunia Street, Doornpoort, 0186.

Telephone: +27 (0) 82 553 8888, E-mail: mglasconsulting@telkomsa.net,

Registration No. 2008 / 262245 / 23

Module 3: Order Management

- Planning, designing and controlling processes which manage and execute customers' orders
- Implementing a customer relationship management (CRM) process
- Understanding key logistics systems, such as EDI and TMS to enable visibility throughout the order process
- Tracking and measuring supplier and carrier performance to improve efficiency and effectiveness
- Managing relationships with the supply chain partners
- Developing a customer service management strategy
- Enhancing long-term customer satisfaction and creating lifetime customers

Module 4: Inventory and Warehouse Management

- Maintaining inventory levels to align with the business strategy and goals, supporting the coordination of supply and demand, while protecting inventory value
- Creating an inventory management strategy that meets competing goals of minimizing inventory costs and maximizing customer service
- Managing the movement of materials and goods into and out of storage efficiently, safely, and with minimal inventory damage
- Adapting to new distribution channels and customer expectations by creating new processes that deliver the desired results
- Implementing efficient and effective warehouse processes, while utilizing appropriate warehouse technology
- Using appropriate packaging to promote safe and efficient materials handling during storage and transportation

Module 5: Transportation

- Understanding transportation fundamentals, including key stakeholders, intermediaries and carriers involved in transporting product from origin to destination
- Understanding the characteristics of the different transportation modes to make appropriate selections based on speed, availability, dependability, capability, frequency and cost
- Moving goods and services throughout a firm's supply chain, between where products are produced and where they are consumed, while allowing for competitive growth
- Effectively manage the entire transportation process—from long-range strategies and operational planning to day-to-day execution
- Utilizing transportation technology to manage and control visibility and communication between multiple stakeholders and transportation managers

Marieta Glas Consulting & Training CC. Address: 222 Petunia Street, Doornpoort, 0186.

Telephone: +27 (0) 82 553 8888, E-mail: mglasconsulting@telkomsa.net,

Registration No. 2008 / 262245 / 23

Module 6: Global Logistics Considerations

- Identifying macro-environmental factors of global logistics that impact countries and organizations around the world to better manage logistics service providers, related transportation costs, and substitute product offerings
- Working knowledge of international trade theories and practices, including trade agreements and trading blocs
- Understanding the infrastructure, systems and regulations of the countries to which goods are imported/exported
- Understanding customs clearing and documentation requirements for each shipment as dictated by each country and transportation mode used
- Preparing all required documentation needed to ensure shipments arrive safely, securely, without damage, and on time at their final designation
- Using the Harmonized System Classification codes to properly specify the goods for export and dictate the corresponding tariff rates charged
- Identifying which financing and payment options are most appropriate and amenable to the parties involved
- Deciding what currency will be most appropriate for global trade participants, balancing levels of risk exposure between buyers and sellers

Module 7: Logistics Network Design

- Designing the network of warehouses and transportation lanes to enable supply to be provided at the place and time of demand
- Analyzing transportation and distribution requirements, while understanding key tradeoffs, to assist in planning and deployment of network
- Using decision support tools to determine the optimal number, location, and type of warehouse facilities
- Employing modeling techniques to help find the right balance among competing needs of involved stakeholders
- Implementing risk management strategies to minimize uncertainty and provide more reliable organizational results
- Creating prevention and mitigation plans, as well as providing business continuity if a risk event occurs

Module 8: Reverse Logistics and Sustainability

- Developing a comprehensive reverse logistics strategy
- Recommending whether the reverse logistics strategy can be handled internally by creating a central returns center or by hiring a third-party provider to coordinate the activities
- Managing product returns in ways that turn the reverse flows into quantifiable value streams, to contribute to profitability and strengthen commitment to sustainability and social responsibility
- Demonstrating social responsibility that is valued by customers, shareholders, and the community, to help the organization be a good environmental steward for the long-term
- Implementing sustainability initiatives to impact the organization's triple bottom line (TBL)
- Choosing suppliers and other supply chain members according to the organization's commitment to implement sustainable processes and practices

Delivery method:

- Self Study
- 16 Classroom based, lecturer led sessions

Eligibility

To be eligible to study the CSCP a candidate must meet one of the following criteria:

- Bachelor's degree or equivalent
- CPIM, CFPIM, CIRM or CPM designation plus 2 years related business experience
- Three years related business experience

Individuals should check their eligibility on the www.apics.org web, and receive an acceptance letter from APICS prior to purchasing material. Failure to comply may result in APICS rejecting your exam registration at a later date.

Maintenance

The APICS Certification Maintenance program allows requirements to be met through multiple sources, including employer-sponsored events and events of related organizations. Maintaining your certification is easy, and you can submit your maintenance application at any point during your maintenance cycle. The link to the Certification Maintenance is <http://www.apics.org/credentials-education/credentials/maintenance/5-easy-steps-to-maintain-your-certification>

Marieta Glas Consulting & Training CC. Address: 222 Petunia Street, Doornpoort, 0186.

Telephone: +27 (0) 82 553 8888, E-mail: mglasconsulting@telkomsa.net,

Registration No. 2008 / 262245 / 23

Exams and Assessments

This is an APICS international examination, which assesses you by a series of multiple choice questions. The exams are Computer Based only. All APICS certification exams will be done on demand. Students can book any date and time throughout the year to take the exam. You will only be able to schedule your exam once you have paid the examination fee and received the Authority to Test (ATT) email from APICS. The exam scores are based on scaled scores.

CBT (Computer Based Testing)

Examinations need to be paid in full before a learner would be able to book an exam.

Maintenance

In order to keep your CPIM designation you are required to maintain it. Certification maintenance cycles run in five-year intervals, commencing from the date of initial certification and ending the last day of the month that initial certificate was received (5 years later).
